

Integrating Digital Career Counselor into Curriculum Example

One of the most effective ways to be sure students are using Digital Career Counselor is to integrate it into classroom curriculum. Check out this example of how Florida International University integrated the tool into their Major Exploration Course!

Week One: Steppingblocks Resource Overview

In week one, introduce the resource to your students. Have them login, show them its features, and allow them explore the resource. Encourage them to revisit Digital Career Counselor throughout the course.

Week Two: Personality Assessment

In week two, have students login to the tool and complete the personality assessment and walk them through the Personality Compare and Contrast activity linked in the Curriculum eBook Guide. Guide them as they explore major options that may be good fits for them!

Week Three: Outcomes Activity

In week three, have students login to the tool and complete the Outcomes activity linked in the Curriculum eBook Guide, and lead them as they explore possible outcomes related to majors and programs they discovered in the prior week.

Week Four: Search360 by Major Activity

In week four, have students login to the tool and complete the Search360: Search by Major activity linked in the Curriculum eBook Guide. Walk them through the accompanying worksheet and support them as they discover more about the major they are interested in.

Week 5: Search360 by Career Activity

In week five, have students login to the tool and complete the Search360: Search by Career activity linked in the Curriculum eBook Guide. Walk them through the accompanying worksheet and support them as they discover and explore career paths that they are interested in.

Week 6: Job Board Activity

In week six, have students login to the tool and explore the job board to explore job titles they are interested in. Be sure to explain to the students to continue to use the resource to explore their interests as they make their major decisions.
